PROFILE SUMMARY

Data Analyst with hands-on experience supporting Veolia North America's Lead Replacement Program by analyzing operational data, validating records, automating reporting workflows, and improving data quality across multiple business systems. Skilled in SQL, Excel, Google Sheets, Power BI, Python, and Google Apps Script with experience cleaning, reconciling, and analyzing large datasets to identify trends and support business decisions. Strong analytical and problem-solving abilities with experience collaborating across operations and project management teams.

TECHNICAL SKILLS

- **Data Analysis:** Microsoft Excel (Advanced), Google Sheets, Power BI, Tableau, SQL, Dashboard Development
- **Data Management:** Data Cleaning, Data Validation, Data Reconciliation, Data Quality Assurance, Trend Analysis
- **Databases:** MySQL, PostgreSQL, Oracle, Database Querying, Data Extraction, Data Transformation
- **Programming:** Python, SQL, Java, JavaScript, TypeScript, C++, Google Apps Script Automation
- **Reporting & BI:** Data Visualization, Business Reporting, KPI Tracking, Cross-System Analysis, Workflow Tracking
- **Cloud & Tools:** AWS (EC2, S3, Lambda), CI/CD, Git, Microsoft Office, Analytical Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst | Veolia North America, Hackensack, NJ

March 2026 –Present

- Analyze operational datasets supporting the Lead Replacement Program to identify missing and inconsistent records.
- Validate and reconcile data across Hexagon, Work Order Logs, Montana, JFC, Conquest, and Google Sheets daily.
- Develop Excel and Google Sheets trackers using advanced formulas, lookups, filters, and data validation tools.
- Automate reporting workflows using Google Apps Script to notify teams of newly added work orders and EAM IDs.
- Create reports and dashboards tracking project progress, replacement status, missing opt-ins, and workflow metrics.
- Investigate data discrepancies with project managers and recommend corrective actions to improve reporting accuracy.
- Clean, organize, and analyze operational datasets to maintain data integrity and support business decisions effectively.
- Collaborate with operations and project teams to improve reporting processes and ensure accurate project tracking.

Software Developer | Sikhi Solutions Inc., Howell, NJ

Aug 2025 – March 2026

- Analyze structured application datasets to identify inconsistencies and improve overall data quality and accuracy.
- Validate and reconcile data across multiple systems to ensure reliable reporting and operational consistency.
- Develop SQL queries to extract, transform, and analyze data supporting business reporting and application workflows.
- Build Excel and Google Sheets reports using formulas, lookups, and data validation to monitor project progress.
- Create dashboards and performance reports to visualize key metrics, trends, and operational data insights.
- Collaborate with cross-functional teams to resolve data issues and improve reporting processes and documentation.

Software Analyst | Innovatus Technologies, India

Aug 2021 – Jul 2023

- Maintain and validate PostgreSQL databases to ensure high levels of data accuracy, integrity, and consistency.
- Analyze structured datasets to identify trends, discrepancies, and opportunities for process improvements.
- Perform data reconciliation across multiple systems to resolve inconsistencies and improve reporting quality.
- Develop SQL queries to extract, clean, and organize data for business reporting and operational analysis.
- Implement validation processes that reduced recurring data defects by 35% and improved data reliability.
- Collaborate with development teams to maintain accurate documentation and support data-driven decision making.

PROJECTS

AI-Powered Portfolio Chatbot

May 2025

- Developed an AI-powered chatbot that enables users to interact with portfolio content using natural language.
- Integrated retrieval-augmented generation (RAG) to deliver context-aware and accurate responses from indexed data.
- Optimized backend data processing, reducing response latency by 35% and improving overall user experience.

ArtistHub

May 2024

- Developed a full-stack marketplace connecting artists and buyers through secure user authentication and transactions.
- Designed relational database schemas to manage user profiles, artwork listings, orders, and transaction records.
- Improved application performance by optimizing database queries, reducing data retrieval time by 60%.

JSON REST API for User Forums

Sept 2023

- Designed and developed a RESTful API supporting over 1,000 daily requests for forum posts and user interactions.
- Implemented authentication, input validation, and error handling to improve application reliability and security.
- Built scalable backend services using structured database operations for efficient data storage and retrieval.

Skin Disease Detection Using Machine Learning

Aug 2022

- Developed a CNN-based deep learning model to classify over 10,000 skin disease images with 94% accuracy.
- Applied image preprocessing, augmentation, and feature extraction techniques to improve model performance.
- Built a user-friendly application enabling image upload and real-time disease prediction using the trained model.

EDUCATION

Master of Science in Computer Science

May 2025

Stevens Institute of Technology, New Jersey, USA

Bachelor of Engineering in Computer Science

June 2023

Marathwada Mitra Mandal's College of Engineering, India
